A Swift tour of the Spa

THE GREENHOUSE

The Greenhouse, the heart of House Spa, is a light-filled lounge offering tranquillity, comfort and delicious food. Enjoy a healthy menu, scrumptious delights and soothing drinks. With a sun terrace to unwind on and a cosy fireside for colder evenings, it's the perfect spot to relax before returning to everyday life.

THE BATHING ROOM

Experience refined relaxation at House Spa. Unwind in the elegant indoor Infinity Pool, a 16-metre heated swimming pool designed for both refreshing swims and peaceful relaxation. Alternatively, dip into the warmth of our outdoor hydrotherapy pool, where therapeutic water jets provide soothing relief, even on the coldest winter days. To maintain a calm atmosphere for all guests, we operate a 60-minute booking system for pool and thermal facilities.

THE THERMAL SUITE

Get back to nature and experience a true fire and ice journey in The Thermal Suite. By combining hot and cold experiences, the body receives both an internal and external 'workout', improving skin tone and appearance whilst delivering immense therapeutic benefits. Choose from our aromatic steam room, our experience shower with a choice of forest mist, tropical rain or arctic blast, or try our beautiful Himalayan Salt Sauna. The salt particles help ease asthma and breathing difficulties, reducing inflammation and aiding healthy breathing, while also boosting the body's natural immunity to coughs, colds and illness. Enjoy the snow shower, where cool snowflakes gently fall, refreshing your skin and awakening your senses. The chill offers a relaxing contrast, leaving you feeling refreshed and revitalised. This exhilarating cold experience stimulates circulation, tightens the skin and enhances overall vitality. Often used after a sauna or steam room, the sudden contrast helps to strengthen the immune system, reduce muscle inflammation and aid post-exercise recovery.

THE FLOAT TANK

Over 500kg of Epsom salts are added to the i-sopod flotation tank and mixed with 1,000 litres of water. This creates a highly buoyant environment in which people naturally float to the surface without any effort. Floating in this way allows the user to escape the forces of gravity, relaxing the muscles and releasing tension.

THE GYM

Our hotel offers a well-equipped fitness centre as part of its comprehensive wellness facilities. The gym features state-of-the-art cardio and weight equipment, providing guests with modern amenities for their fitness routines.

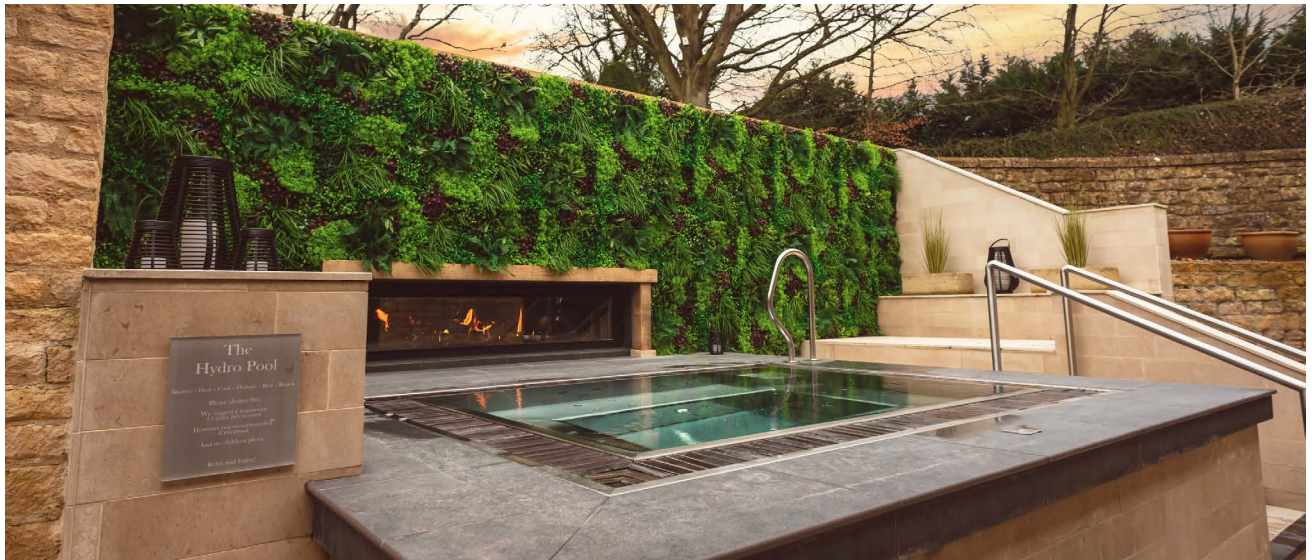

THE SUITE OF TREATS

With six beautiful treatment rooms and a range of soothing therapies, we're here to help you relax and feel your best. Take a look, you won't want to miss out.

The Float Tank

60 minutes

Over 500kg of Epsom salts are added to the i-sopod floatation tank and mixed with 1,000 litres of water. This creates a highly buoyant environment in which people naturally float to the surface without any effort. Floating in this way allows users to escape the forces of gravity, relax their muscles and release tension.

With the light switched off and the absence of any sound, there is no external stimulus for the brain to focus on. It is then quite natural to slip into a deeply relaxed mental state. As well as being pleasant and enjoyable, this state allows us to rest and regenerate both physically and mentally.

A session in the i-sopod will typically lead to an enhanced sense of well-being and improved physiological functioning, as the combination of deep mental and physical relaxation provides a host of benefits.

After each session, the pod initiates its cleaning cycle. The entire contents of the pod are displaced 3.75 times by an industrial-strength pump through a 1-micron filter, ensuring that the environment remains completely free from any detritus. The titanium-encased heater maintains the water at a constant skin temperature, while automatic disinfection ensures that no bacteria or pathogens can survive.
